The Austin-Healey Sprite (H-AN5)

The Austin-Healey Sprite (Mark II)

The M.G. Midget (Mark I)

EXPLANATORY

- The range of parts in this List covers all serviceable components on model/models to the standard specification. Where the part is confined to one specification this is clearly defined in the Description or Remarks column, and where the part listed is not serviced, this is indicated by the letters NSP in the Part No. column.

  This List is provided with a Group Index on the title-page, and also more detailed indexes at the beginning of each separate Section. Additionally, a Part Number Index is also provided in the preface pages.

- The Part Number Index will be issued twice yearly.

- Items comprising an assembly (or sub-assembly) are inset for easy reference. This principle is followed in all Parts Lists, typical examples being given below.

  Examples:

  Crankshaft assembly ..... AMK 2254
  Plug ..... AMK 97

  Panel assembly—rear lower ..... CZA 418
  Angle—attachment—rear bumper ..... CZA 147
  Bracket—rear bumper support ..... CZA 164

- The word 'Quantity' as shown in the heading of all text pages is intended to convey that all figures appearing in that column are quantities used on a particular application and not quantities used per vehicle.

- The assemblies and components in the plate illustrations are identified by numbers which correspond with the illustration references appearing on the facing text page in the column immediately following the Part Number. Note the use of squares, rectangles, and circles on the Illustration Plates. The square/rectangle indicates an assembly which comprises all component parts shown enclosed. The components can, in turn, be supplied separately providing Illustration Numbers are shown against them. A circle embracing certain components is used to give a magnified view of the items which are too small to show up in detail if illustrated on the same scale as the other parts on the plate.

- It is essential first to identify the part against the illustration in the appropriate Section of the List, and then make use of the illustration reference number to locate the correct Part Number and official description on the adjacent page, taking into account Engine, Car, and Commission Numbers, etc.

- ABBREVIATIONS: Standard abbreviations are employed. The complete range of abbreviations covering all lists is given below.

A	Ambulance	ID	Inside diameter	Q	Chassis and Cab
A/R	As required	I.P.T.O.	Independent Power Take-off	R	Chassis and Scuttle
B	Basic	J	Convertible	(RA)	Rear axle number
(B)	Body number	K	Truck	RH	Right-hand
(BP)	Belt pulley number	KPH	Kilometres per hour	RHD	Right-hand drive
B.R.S.	British Road Services	L	Hire Car	RHT	Right-hand thread
C	Chassis number	LC	Low compression	(RP)	Rear pulley number
(C)	Car number	LH	Left-hand	S	4-door Saloon
(CB)	Cab number	LHD	Left-hand drive	(S)	Super de-luxe
(CN)	Commision number	LHT	Left-hand thread	ST	Soft Top
CP	Chrome-plated	LWB	Long wheelbase	STD	Standard
D	Coupé or GT	M	Limousine	SWB	Short wheelbase
(D)	De-luxe	MB	Minibus/Omnicoach	2S	2-door Saloon
DC	Double-coil	MPH	Miles per hour	T	4-seater Tourer
D/E	Double-ended	N	2-seater Tourer	T.I.B.	Technical Information Bulletin
dia	Diameter	No.	Number	U	Pick-up
E	G.P.O. Engineering	NSP	Non-serviceable part	UK	Gt. Britain and Northern Ireland
(E)	Engine number	OD	Outside diameter	U/S	Undersize
EP	G.P.O. Planning	(OD)	Overdrive number	V	Van
EXP	Export	O/S	Oversize	W	Dual-purpose (wood framing)
(FA)	Front axle number	P	Hard Top	WB	Wheelbase
G	G.P.O. Postal	pr	Pair	Ws	Dual-purpose (all-metal)
(G)	Gearbox number	psi	Pounds/square inch	W.S.E.	When Stock Exhausted
GP	General Purpose Carrier	PSV	Public Service Vehicle	X	Taxi
H	Hearse	P.T.O.	Power Take-off		
HC	High compression				
(HU)	Hydraulic unit number				

EXPLANATORY—*continued*

- Amendments to this List will be effected by means of revised pages. Should it be necessary to add an additional page or pages to interrupt the existing sequence of page numbers, the added pages will be numbered as in the following examples, which illustrate what would happen if it became necessary (A) to extend the information on a text page beyond the limits of that page or (B) to add an illustration page between existing illustration pages. Use of the decimal notation avoids the necessity of re-numbering and reprinting all pages in any section after the newly introduced page.

Example (A)

Existing text pages	BA 5, BA 6, BA 7, etc.
Added text pages	BA 5·1, BA 5·2, BA 5·3
Page sequence will then read	BA 5, BA 5·1, BA 5·2, BA 5·3, BA 6, etc.

Example (B)

Existing plates	A 5, A 6, A 7, etc.
Added plates	A 5·1, A 5·2, A 5·3
Plate sequence will then read	A 5, A 5·1, A 5·2, A 5·3, A 6, etc.

- When information on a page has been revised this is shown by the inclusion of a dagger †, indicating what has been revised at that issue.

- As revised pages are issued an Index showing the Issue Number will be added to the List and reprinted with each circulation of revised pages.

Claims under Warranty

Claims for the replacement of material or parts under Warranty must always be submitted to the supplying Distributor or Dealer, or when this is not possible to the nearest Distributor or Dealer, informing them of the vendor's name and address.

BMC Service Parts List Spine Labels

These have been designed with a colour code to enable users to file or find Parts Lists readily. The system is as follows:

Coloured rectangles at top of spine

'Families' of passenger cars will always have a common colour (e.g. Lilac for the BMC Minis).

Heavy commercial vehicles will have a common colour throughout—Red.

Light commercial vehicles will have a common colour throughout—Grey.

Second coloured rectangle

This indicates what the List deals with, as under:

Red	Mechanical.	Tan	Power Unit (Diesel).
Light Blue ...	Body.	Magenta ...	C.V. Chassis.
Brown ...	Power Unit (Petrol).	Deep Yellow ...	C.V. Body and Cab.
Pink	Engines.		

Coloured circles

These indicate the franchises covered by the List. For any particular franchise the circle will always appear at the same height on the spine label. Additionally, it will be coloured as under:

Blue	Austin.	Pink	Wolseley.
White	Morris.	Maroon	Vanden Plas.
Yellow ...	M.G.	Stone	Austin Commercial.
Grey	Riley.	Green	Morris Commercial.

Title-page

For easy identification when the List is lying flat the colour of the text of the title-page repeats that on the spine label, indicating whether the List is Mechanical, Body, etc.

IMPORTANT TO OWNERS

BRITISH LEYLAND
BMC SERVICE

BMC SERVICE PARTS

Owners are strongly advised to insist on the use of BMC Genuine Parts. These may readily be identified by the label below and many are packed in characteristic cartons. They are available through any Distributor or Dealer, who can also provide details of the wide range of BMC Approved Accessories not covered by this publication.

Replacement parts that are not of genuine BMC manufacture cannot be relied upon to be of BMC specification, material, and workmanship, and therefore BMC cannot be expected to extend their Warranty to vehicles which have been fitted with parts not of their manufacture.

BMC reserve the right to make changes or improvements in the construction or equipment of their products at any time.

In order to ensure prompt and correct execution of your orders it is essential to quote:

1. The relative **Unit Number,** together with prefixes, suffixes, and specification reference where applicable:
   e.g.: Axle, Body, Cab, Car, Chassis, Commission, Engine, and Gearbox Numbers, etc.
2. The **Part Number** and **description** (prefix letters to Part Numbers must always be quoted).
3. The **quantity** required, bearing in mind that the quantities shown are those used in the application actually illustrated on the Parts List in question. Sometimes only minimum packaged quantities are available. These packs may well contain more parts than are required for a single job; for details of packaged quantities, see the confidential Service Parts Price List.
4. Always state the **colour** of carpets, painted items, trim items, etc.

Vehicle Identification
Serial Number Prefix Letter Code

The car number prefix comprises a series of letters and numbers, presenting in code the make, the engine type, the body type, the series, and, where applicable, left-hand drive.

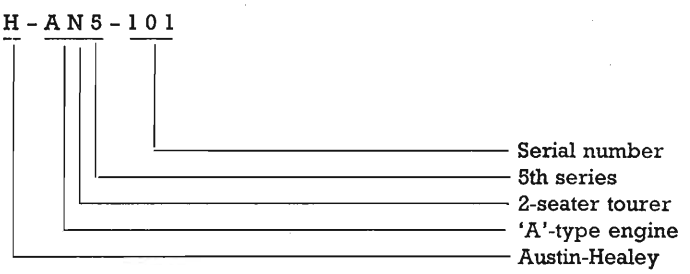

1st PREFIX LETTER—Name	2nd PREFIX LETTER—Engine type
G—M.G. H—Austin-Healey	A

3rd PREFIX LETTER—Body type

N—2-seater tourer

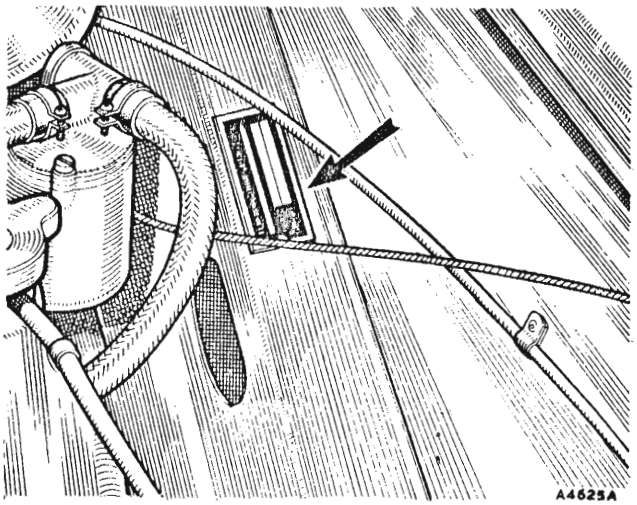

4th PREFIX—Series of model	5th PREFIX (used to denote car is different to standard right-hand drive)
1—1st series (M.G.) 2—2nd series (M.G.) 5—5th series (Austin-Healey) 6—6th series (Austin-Healey) 7—7th series (Austin-Healey)	L—Left-hand drive

CODE EXAMPLE

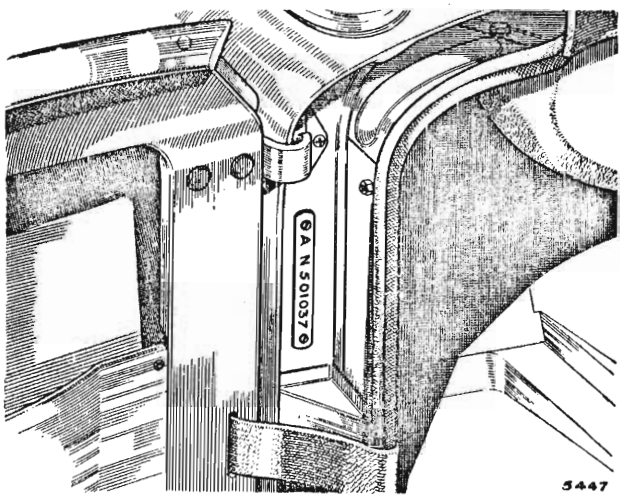

Always quote these prefixes with Car Serial Numbers

Location of Unit Numbers

The **Car Number** is stamped on a plate secured to the left-hand inner wheel arch valance under the bonnet

The **Body Number** is stamped on a plate secured to the left-hand front door pillar

Key to Body Exterior and Main Trim Colour Combinations, from Start of Vehicle Production

The BMC colour code numbers quoted in the following text relate to the paint colour samples in the 'BMC Service Paint Scheme,' publication ref. AKD 1482.

In the case of two-tone body exterior colours the colour below the break line is quoted first.

In the case of two-tone body exterior colours where a principal colour appears above and below the central band of another colour, this is suitably indicated.
